

# SU SERIES HANDLE

## TECHNICAL INFORMATION

### Description

The "SU" Series Control Grip is a low cost compact handle designed for simple applications that require few switches.

The "SU" handle is configurable with Handle Options such as; slider modules, rocker modules, microjoystick, LED's, toggle switches and more. It also offers accessories such as bushing adapters, studs, sealed connectors and more. (Please refer to Handle Accessories on our website.)

The cases are molded from a high impact plastic polymer into a comfortable shape for a rugged and lightweight control handle for extreme duty applications. The Grip switches are covered with our patented overlay design.

Standard configurations are available for next day shipping (please contact factory for details).
