JE SERIES HANDLE

TECHNICAL INFORMATION

Description

The "JE" Series Control Grip is our newly designed handle that provides a more ergonomic feel and additional trigger options. It can be configured to offer up to 4 switches in the faceplate as well as the option for a trigger switch and a lower trigger switch or operator presence switch. The "JE" handle is optimized to be installed on a electronic joysticks.

The "JE" Series control grip is customizable with all handle Options such as; slider modules, rocker modules, microjoystick, LED's, toggle switches and more. Accessories such as studs, sealed connectors and more are also available (Please refer to Handle Accessories on our website).

The cases are molded from a high impact plastic polymer into a comfortable shape for a rugged and lightweight control handle for extreme duty applications. The standard switches are covered with our patented overlay design.
